

WESTERN REFRIGERATION PVT. LTD.

VPS Environment Checklist

Product: WRL Portal

Version: 1.0 draft

Date: 2026-09-02

Production: <https://wrl-dashboard.vercel.app>

Internal — Handover Documentation

Status: Needs sign-off — requires SSH to production host. Values below are **intended** from repo docs; verify on server before marking complete.

Purpose: Confirm production VPS configuration before formal handover.

Reference: [PROD_READ_SOURCE.md](#) , [MAIL_SCHEDULE.md](#) , [SYNC_ENTRY_POINTS.md](#)

Sign-off

Field	Value
Verified by	_____
Date	_____
Host / path	/opt/fast-close-app (confirm)

1. Postgres read-model flags

SSH to VPS, check `.env` matches intended production (from `PROD_READ_SOURCE.md`):

Variable	Expected prod	Verified
<code>READ_SUMMARY_FROM</code>	<code>postgres</code>	[]
<code>READ_REGISTER_FROM</code>	<code>postgres</code>	[]
<code>READ_DISTRIBUTION_FROM</code>	<code>postgres</code>	[]
<code>READ_DIMS_FROM</code>	<code>postgres</code>	[]
<code>READ_ARCP_FROM</code>	<code>postgres</code>	[]
<code>ARCP_USE_LIVE_CRM</code>	unset or <code>false</code>	[]
<code>DATABASE_URL</code>	VPS Postgres	[]

- ☐ Read-model schema applied: `npm run db:apply-read-model:vps`
 - ☐ `calls_latest_hot` lag acceptable (~3 min) — check `/admin/sync`
-

2. CRM connectivity

- ☐ CRM MS SQL credentials in `.env` (read-only user)
 - ☐ Sync worker reaches CRM: `npm run sync-worker:incremental` (or check `sync-worker` systemd logs)
 - ☐ No repeated connection errors in sync logs
-

3. Mail

- ☐ SMTP / relay per `PROD_READ_SOURCE.md` and `scripts/vps-hosting/`
 - ☐ `outboundMailEnabled` + allowed domains tested from Mail & Alerts hub
 - ☐ **One** `*/15` crontab line → `mail-scheduler.sh` (not duplicate MIS + subcontractor lines)
 - ☐ `mail-scheduler.log` shows recent runs
 - ☐ `mis-email-morning-watchdog.sh` cron present (09:50 Mon–Sat)
 - ☐ `evening-ops-sequencer.sh` cron present (16:00 daily)
-

4. Sync workers (systemd)

Unit / script	Check
<code>fast-close-sync-worker</code> (incremental)	[] active, logs clean
Nightly timer / <code>sync-worker-nightly.sh</code>	[] runs
<code>/admin/sync</code> from portal	[] healthy status

5. Subcontractor stock

- ☐ SAP inbox credentials in config

- ☐ `subcontractor-stock` cron or `mail-scheduler.sh` step runs
- ☐ Manual reconcile test on VPS completed once

6. Secrets and relay

- ☐ `.env` not in git
- ☐ `CRON_SECRET` matches Vercel if portal relays to VPS
- ☐ Supabase keys on Vercel only (unless VPS needs specific keys)

7. Backups

- ☐ Postgres backup procedure — **not documented in repo**; ops to define (see [docs/sync.md](#) rollback note)

Verification commands (examples)

```
# On VPS – adjust path
cd /opt/fast-close-app
grep READ_.*_FROM .env
systemctl status fast-close-sync-worker
tail -50 logs/mail-scheduler.log
crontab -l | grep -E 'mail-scheduler|evening-ops|sync'
```

Notes / deviations
